

KAMYAAB

Verified Work. Trusted Hands.

A trust-based hiring platform connecting Karachi's blue-collar workers with the households and businesses who need them.

Team Members:

1. Huriya Zafar
2. Momna Khalid
3. Muhammad Abdullah
4. Wajid Ayub
5. Asad Siddiqui
6. Nandni

THE PROBLEM

Finding a reliable electrician, painter, or plumber in Karachi is a gamble.

- No centralized, verifiable way to find blue-collar workers
- Hiring happens through word-of-mouth or informal labor chowks, no record of skill or reliability on either side
- Clients face no-shows, poor-quality work, and scams with no recourse
- Workers lose income between jobs because demand is informal and inconsistent

WHY IT MATTERS

This isn't a niche problem, it's a daily battle thousands face.

- Home & business repair needs come up in nearly every household, every week
- Emergencies (AC down, pipe burst) need same-day response
- Scams, redone work, and wasted time all carry real cost
- Smartphone & digital payment penetration rising 12-15% CAGR (PTA)

The numbers:

- Pakistan's employed workforce: 77.2 million people (Labour Force Survey 2024-25, PBS)
- 80.8% of employed Pakistanis work informally, no contracts, no verification, no record of reliability
- Craft and related trades workers (electricians, plumbers, carpenters, and similar trades) make up 13.2% of national employment, roughly 10 million people
- Sindh's labour force: 18.5 million, up 3.2 million since 2020-21

OUR SOLUTION

Kamyaab is built around how Karachi actually works, including the fact that most workers don't carry a smartphone.

- Clients use the app: search by category and location, view verified worker profiles, contact directly
- Workers don't need the app at all: they're onboarded once, in person, by a local agent, after that, a client contact is just a phone call or message away

HOW IT WORKS

- Worker signs up through a local agent (in-person verification)
- Client opens the app and searches by category + area, e.g. "Plumber near Gulshan"
- Client contacts the matched worker directly
- Work gets done, client pays the worker directly
- Client leaves a rating & review, building the worker's trust profile over time

PRODUCT FEATURES & TARGET MARKET

- Location + category search: find workers near you, by trade
- Verified profiles: agent-checked CNIC and reference, not a self-reported badge
- Direct contact: client and worker connect directly, no middleman on the job itself
- Two-way ratings & reviews: accountability on both sides
- Worker categories: electricians, plumbers, carpenters, gardeners, painters, drivers, tailors, cooks
- Demand side: Smartphone-owning households and small businesses in Karachi
- Supply side: Blue-collar workers across Karachi, regardless of phone type, reached through local agents
- Launch market: One Karachi neighborhood → citywide → national

Phase 3

Phase 2

Phase 1 — MVP

ROADMAP

PHASE 1 — MVP

Location/category search, agent-led worker verification, direct contact & rating

PHASE 2

Voice-based job posting & AI-assisted matching, material/supplier bundling from Small-Scale/Large-Scale businesses

PHASE 3

Multi-city expansion, B2B housing society partnerships

COMPETITORS

Karsaaz

Smartphone-owning technicians,
app-managed profiles.
Doesn't serve keypad-phone
daily wagers.

Hire-Workers.pk

Quote-based worker directory.
No location-based search, no
agent verification.

TApp / Tasdeeq

B2B worker background
verification.
Not a hiring/matching platform
for individual clients.

Existing platforms serve workers who can already manage a smartphone profile. Kamyab serves the workers who can't; the larger, underserved half of this market.

TRUST, RISK & HOW WE HANDLE IT

- What stops clients and workers from just skipping the app after the first job?
- What does 'verified' actually mean?
- How do you solve the cold-start problem?
- Most blue-collar workers don't have smartphones, how does this work?

HOW WE ACTUALLY MAKE MONEY

Commission-based marketplace — Kamyaab earns a % of job value, not a subscription

Revenue Streams

- Commission per job (Primary) — small % of job value, charged on completion
- Priority listing (Secondary) — workers pay a small fee for higher visibility in matches
- B2B partnerships (Phase 2) — housing societies/businesses use Kamyaab as recommended vendor

Unit Economics

- Commission per job: Rs. 50–150
- Jobs per worker/month: 8–12
- CAC (worker, via agent): Rs. 200–400 | CAC (client): Near-zero

Estimates — to be refined with pilot data

VISION AND CLOSING

Kamyaab is designed as a real, sellable product, not just an internship exercise.

- Launch a live pilot with real workers and clients in one Karachi neighborhood
- Prove the trust loop works at small scale before expanding
- Explore partnerships with housing societies and small businesses as early B2B customers
- Position for future investment or revenue-sharing as the platform scales

Thank you.
